To be considered for enrollment for the school year 2021-2022, prospective Bessemer Academy students entering grades 1-5 will be required to take a skills assessment before enrollment occurs. This assessment will evaluate their basic skills in reading, math, writing and/or language depending on their grade. With so many disruptions to learning during the pandemic, we want to ensure success in the curriculum taught per grade level.

A score of 70 percent or above must be made on the assessment for immediate enrollment. If a prospective student scores lower, a meeting will be scheduled with parents to discuss needed remediation. We must have a commitment from parents to work over the summer to remediate skills as needed. A reassessment may be given in July to reconsider enrollment.

Our goal is for all students to be successful. This assessment will help our teachers better serve the students in the classroom. Assessments will be scheduled by the office.
